

Munich/Zurich. The International Church Convention of the New Apostolic Church is now to be seen in a five-minute-film. Since the end of last year, each divine service transmitted by satellite is preceded by this trailer to give the divine service visitors an outlook on the first International Church Convention (ICC) and the coming Pentecost Feast.

The first transmission took place on November 24, 2013, when the international church leader, Chief Apostle Jean-Luc Schneider, held a divine service in Rostock that was transmitted to the congregations of the district apostle area Northern Germany. Since then the film has been shown in many other district churches and is now available for download.
