Zurich. Chief Apostle Wilhelm Leber has announced that his predecessor in ministry, the retired Chief Apostle Richard Fehr, has suffered a stroke. In the meantime, therapy has already begun in a rehabilitation facility. Chief Apostle Leber asks all members to pray for the sick Chief Apostle.

The original text of Chief Apostle Leber's announcement is as follows:

*Dear brethren in faith,*

*It is my sad duty to inform you that Chief Apostle Fehr has recently suffered a stroke, which has resulted in partial paralysis. In the meantime, he has begun therapy in a rehabilitation facility and there has been some small initial progress. Thus there is hope for further improvement, although therapy will need to continue for some time yet.*

*Chief Apostle Fehr is grateful for all intercessions. However he requests that members refrain from visiting and from making inquiries with his wife or other family members.*

*Further information will be provided in due course.*

*With warm greetings,*

*W. Leber*
