# Catastrophe in Southern Asia

Zurich. The terrible seaquake and tidal wave that has claimed the lives of many tens of thousands of victims throughout the entire region of Southern Asia and beyond is a terrible catastrophe. Chief Apostle Richard Fehr, head of the New Apostolic Church International, extends his deepest sympathy to all who have been affected by the disaster.

The state of the news is still somewhat unclear, with new damage reports coming in on a continual basis. At present it is not known whether any - or how many - members of the New Apostolic Church have come to harm in the affected regions. For this reason no global aid appeal has been launched for the congregations of the New Apostolic Church around the world as of this moment.

However, the usual accounts of NAK-karitativ remain open for donations. For more information visit www.nak.de/karitativ/
