From Wiesbaden into the wide world: Pentecost divine service by the chief apostle will be transmitted throughout the world!

Wiesbaden. Traditionally the Pentecost divine service has always been of special significance on the calendar of the New Apostolic Church. This year Chief Apostle Richard Fehr and all district apostles and apostles from Europe will come to Wiesbaden (District Church of Hesse). A few thousand receiving stations will be connected via satellite transmission.

Well over one million believers will experience the chief apostle's serving "live" on Pentecost Sunday. This will be made possible by the modern satellite technology the church uses to transmit large festive services. New Apostolic congregations throughout all of Europe, the USA, Canada, Argentina, Brazil, Chile, Uruguay, Paraguay, as well as in South Africa, Botswana, Mozambique, Zimbabwe, Zambia and large parts of Asia, will be able to enjoy this Sunday's live transmission.

Further details on this festive divine service will be published on the official homepage of the District Church of Hesse/Rhineland-Palatinate/Saarland (see www.nac-mgemnowa.org/gk/de/mitte/).
